USING YOUR MEID@MARICOPA ACCOUNT WITH screenr℠

1. Go to http://screenr.com. You do not need to log in to actually *create* a screencast, but you will need to log in to share your screencast video when it is completed.

   Screenr now allows you to log in using your existing account information with Twitter, Facebook, Google, Yahoo, LinkedIn, or Windows Live. To log into screenr using your MEID@maricopa.edu account (this works because these are actually Google accounts), first click the "Sign in with:" button in the top right corner, then select "Google" from the options that pop up:
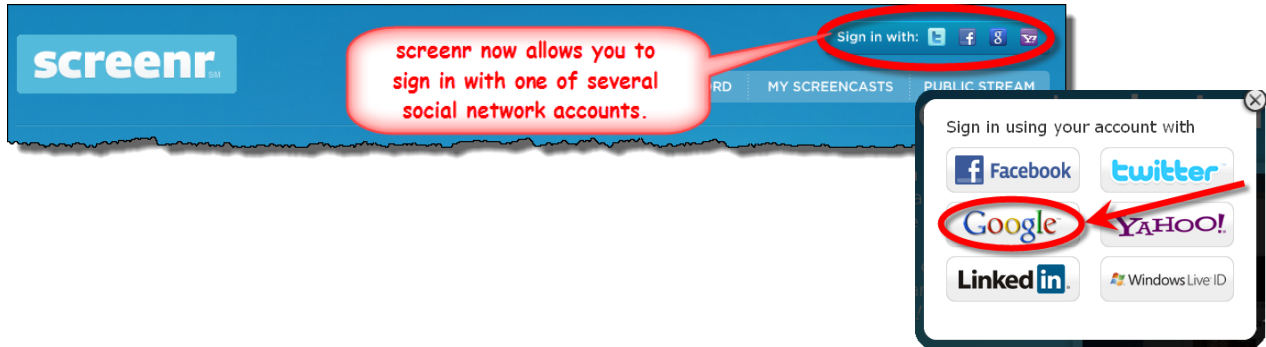

2. Enter your MEID login information, and click "Sign in." For a moment, you may think that something has gone wrong, because you are still seeing the "Sign in with your Google Account" box -- notice, though, that there is now a message that says "To sign in with this account, click continue." If you click the "Continue" button, you will be taken to the MCCCD login page. Complete your usual login information, and click "Log In:"

3. **If this is your first time logging in**, you will get a "Welcome to your new account" message. To proceed, you will need to accept the terms of service by clicking the "I accept…" button at the bottom.
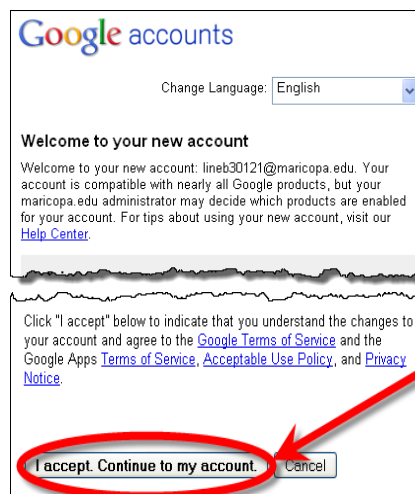

4. Once you have accepted the terms of service, Google Accounts will want to confirm that you want to allow screenr to connect with your Google account. Click "Allow."

Only one more step – choose a Screenr username, then click "Complete registration." You have completed your registration with screenr, using your MEID@maricopa.edu account!
